Global Support Services

SCIS has developed a proven capacity to service both short and long term deployments of security personnel both domestically and abroad in support of various logistical and protection projects, including U.S. communication satellite launches. The safeguarding of U.S. technology and assisting our customer's in meeting their export compliance, government mandates, and other internal needs around the world is at the core of SCIS Global Support Services (GSS).

Even in familiar areas, force protection and risk mitigation can be a challenge. An overseas project brings a multitude of additional variables to include staffing and logistical challenges that if not handled with the support of an established partner could lead to mistakes that may impact project timelines and deliverables. SCIS is that trusted partner having supported 200 plus overseas deployments in 10 countries since 1994.

Our GSS personnel are specifically selected for overseas projects based on their outstanding record of performance and ability to meet stringent customer requirements at overseas locations. SCIS can offer the following services, in addition to other unique specific personnel proficiencies required, in support of OCONUS campaigns.

Capabilities Include:

- Physical Security Support Services
- COMSEC Support
- Escorting Personnel/Equipment
- Temp/Long Term Deployment
- Courier Services
- Security Operations Center Support
- Document Control Support
- Site Surveys
- Monitoring
- Limited Logistical Support

In addition to the above services, SCIS can customize support services to fit the needs of our customers.

"Their specialized support provides us with the expertise, trust and the key set of skills needed to successfully accomplish our combined missions for a wide range of domestic and international customers. We appreciate and value SCIS' services and staff and consider their role integral to the success of our business."

- A Satisfied Customer
